

Andre BIGIRIMANA

Managing Director

PROFILE

Well-rounded civil and structural engineer and business Managing Director with valuable experience in civil engineering and the built environment. Competent in civil engineering design concept and analysis, management and project delivery engineering. Excellent at developing safe and efficient design solutions for complex schemes in urban areas with severe constraints, meeting the expectations of contractors and clients. Brings extensive temporary works design, checking and coordination experience across HS2, rail, water, utilities, energy and heavy civils schemes.

CORE SKILLS

- Business management & leadership / Commercial & financial management / Contract management (NEC3)
- Temporary works design, checking & management / BS 5975 / PAS 8811 / Temporary works co-ordination (TWC)
- Civil engineering design & project management / Heavy civils / Foundation design / Tunnel & shaft design
- Water & wastewater engineering / Road infrastructure / Railway infrastructure works / Utilities
- Health & safety regulations / CDM 2015 Principal Designer & Designer duties / Quality assurance & control
- Eurocodes EC1, EC2, EC3, EC5, EC6, EC7 / Ground support systems – deep excavations / Confined space working
- Super Stress / AutoCAD 2D / CSC Tekla TEDDS / CSC Tekla Designer / Fastrak Designer / Microsoft Office

PROFESSIONAL EXPERIENCE

❖ TIFAND LIMITED — *(November 2020 – Present)*

Managing Director

- Develop and implement the business strategies of the company.
- Establish internal company policies, procedures and legal protocols.
- Oversee investments, business ventures and financial stability.
- Check and approve designs produced by Chartered Engineers prior to submission to clients.

- Direct the implementation of policies and procedures to ensure that the company complies with all health and safety and other statutory regulations.
- Develop, promote and direct the implementation of equal opportunities policies in all aspects of the company's work.
- Represent the company in negotiations with clients, suppliers, government departments and other key contacts to secure the most effective contract terms.

❖ ASC (ARCADIS SETEC COWI) JOINT VENTURE – HS2 — (April 2021 – May 2022)

Temporary Works Manager

Arcadis, Setec and Cowi formed a Joint Venture to support the EKFB (Eiffage Kier Ferroviaal BAM) Construction Joint Venture with the design of HS2 Packages C2 (North Portal Chiltern Tunnels to Brackley) and C3 (Brackley to Long Itchington Wood Green Tunnel South Portal).

- Worked within the Construction Services package of the Design and Engineering department at Chipping Warden Compound (GS2).
- Responsible for discharging the construction support duties under the ASC scope of services with EKFB for the HS2 MWCC sections C2 and C3.

❖ BERKELEY ST JOSEPH — (August 2020 – March 2021)

Temporary Works Manager and Principal Contractor's Temporary Works Co-ordinator (PC's TWC)

- Managed and coordinated all Temporary Works (TW) activities throughout projects to meet the requirements and obligations defined in BS 5975.
- Verified engineering principles in the review of TW designs, ensuring compliance with project design constraints and raising impacts on safety, programme and commercial matters.
- Defined and recorded the responsibilities of each contractor's or subcontractor's TWC and TWS, where appointed.
- Confirmed builds were as per design, allowing the issue and signing of formal Permits to Load.
- Produced temporary works designs and design checks, ensuring checks covered concept, structural adequacy and compliance with the design brief and scheme specifications.
- Assisted Project Managers and Construction Managers with engineering competence and liaised with the client's engineering representatives.
- Managed the approval and testing of materials, products, plant and systems in line with scheme specifications and client requirements.
- Assisted in the delivery of project quality plans and collated information and data for handover.
- Reviewed TW design briefs, maintained the temporary works registers and ensured a robust process was in place for checking engineering activities.
- Reviewed permanent works designs, managed design change, requested information and resolved technical queries.
- Ensured residual risks identified by permanent and temporary works designers were addressed in accordance with CDM 2015 and that a CDM Design Risk Register was maintained.

- Measured and improved internal TW processes and procedures, reporting to the Designated Individual and Head of Health and Safety.
- Coordinated with construction and completions teams to confirm permanent support structures were installed as designed, allowing the issue of Permits to Unload.
- Delivered Temporary Works briefings and assisted with training requirements.
- Worked with senior management, construction and engineering teams to implement engineering systems, documentation and controls compliant with health and safety legislation and industry standards.
- Ensured site supervisors had full knowledge of each design, particularly its limitations.
- Supported Project Managers and delivery teams in developing scopes of works for civils packages and Temporary Works.
- Developed and maintained the project Temporary Works Register with the Designated Individual, Project Director and Project Manager.
- Monitored the works to ensure TW were implemented in accordance with the TW design and not modified without proper authorisation.
- Oversaw TW interfaces, retaining an overview of the whole project to ensure each step of the procedure was completed.
- Acted as first point of contact between the PD, TWD and site team for all TW matters, and focal point for each contractor's TWC and TWS.
- Reviewed and agreed method statements, risk assessments and operational safety analyses.
- Chaired regular Temporary Works meetings to review, identify, plan and manage temporary works, ensuring design briefs were adequate and reflected actual site conditions.

❖ BARHALE — (April 2017 – July 2020)

Temporary Works Engineer

BAE Systems Submarines Schemes – Barrow-in-Furness

Barhale was subcontractor to Principal Contractor Morgan Sindall, undertaking the construction of shafts and heavy civils works.

- Implemented temporary works and ensured compliance across the BAE Systems delivery function.
- Reviewed and approved construction methodologies in Works Package Plans, Design Risk Assessments, Construction Phase Plans, RAMS and Health and Safety Files.
- Approved Inspection and Test Plans (ITPs) and quality-checked all drawings prior to release to production and installation.
- Produced temporary works designs and design checks, and maintained the temporary works registers.
- Reviewed permanent works designs, managed design change and resolved technical queries.

Severn Trent Water AMP7 – £90 million Birmingham Water Supply Resilience Project

Back-up water supply to Frankley Reservoir and Water Treatment Plant: design and build of a 45 km raw water intake pipeline with several motorway, trunk road, canal and mainline railway crossings.

- Managed and designed temporary works throughout the scheme in accordance with BS 5975 and PAS 8811:2017.

- Prepared and checked detailed technical designs, including structural calculations, drawings, risk assessments and design certificates, and undertook preliminary designs for pricing.
- Obtained independent checks and third-party technical approvals for rail, utilities and temporary works.
- Ensured design outputs met CDM, health and safety and environmental requirements.
- Assisted on commercial and contractual activities, managed subcontractors and supported new tender opportunities.
- Proposed and developed value engineering alternatives and reviewed defects and compensation events.

Network Rail / HS2 – Copthall Cutting Diversion Works

HS2 enabling works: utility diversions crossing existing railway lines and the future HS2 line, involving tunnelling and shaft sinking.

- Project engineer seconded to site with overall responsibility for design and coordination of temporary works.
- Developed designs for Design Check Category 3 and reviewed designs by other consultants for independent checking and approval.
- Ensured works adhered to the Environmental Sustainability Plan, current legislation and the latest design standards.
- Reviewed geotechnical investigations and reports and provided technical direction during construction.

National Grid – Stella West 275kV Substation

Installation of a new 275kV cable circuit at Stella West substation forming the line entry for the new Fourstones – Stella West circuit.

- Produced designs for temporary works above and below ground, and for permanent works.
- Held overall responsibility for temporary works coordination and the technical aspects of the work packages.
- Managed temporary works interfaces between National Grid and the supply chain and ensured residual design risks were communicated to site.

❖ **CARILLION — (February 2012 – December 2016)**

Site Engineer & Assistant Site Manager

Birmingham City Council – The Library of Birmingham

Part of the Big City Plan for Birmingham, with Carillion as Principal Contractor.

- Supervised the selection and requisition of construction materials to ensure compliance with specification.
- Assisted in delivering construction activities covering planning, procurement, safety, quality, temporary works and environment.
- Managed subcontractors, including preparing subcontracts and assessing programmes, costs and progress.
- Liaised with the client and ensured compliance with client quality objectives.
- Supported senior management with tenders, programme reviews, risk analysis and commercial and contractual activities.
- Reviewed and checked detailed design submissions for verification and design assurance prior to execution on site

EDUCATION & TRAINING

- MSc Civil and Structural Engineering
- BEng (Hons) Civil Engineering
- Temporary Works Design (Above and Below Ground) / Tunnel and Shaft Design & Construction
- CITB Temporary Works Co-ordination (TWC) / BS 5975:2019+A1:2011
- CDM 2015 Health & Safety Regulations – Principal Designer and Designer Duties
- NEC3 Conditions of Contract / Principles of Construction Contracts and Law
- Eurocodes EC1, EC2, EC3, EC5, EC6, EC7 / Foundation Design
- Fire Risk Management in Construction / Environmental Management System
- Ground Support Systems – Deep Excavations / Working in Confined Spaces / Management of Scaffolding Operations
- CITB SMSTS (Site Management Safety Training Scheme) / CSCS Card for Professionals

PROFESSIONAL MEMBERSHIPS

- Institution of Civil Engineers / Institution of Structural Engineers / Ground Engineering
- Chartered Management Institute / Chartered Institution of Highways & Transportation / Association for Project Management
- Temporary Works Forum / British Tunnelling Society / Construction Health and Safety Group / Birmingham Chamber of Commerce
