

Anthony Kitenge NGANDU

Senior Design Engineer

PROFILE

Design Engineer within TIFAND Limited's Birmingham office with over 9 years of combined and transferable civil engineering experience gained across several consultancy firms. Experienced in temporary works design development, clean and wastewater design, site surveys and supervision on HS2, AMP6/AMP7 Severn Trent and Thames Water schemes. Skilled in producing compliant designs to CDM 2015, communicating residual risk and supporting senior management with reports, audits and project tendering.

CORE SKILLS

- Temporary works design development / Preliminary structural calculations / Design risk assessment
- HS2 schemes / AMP7 Severn Trent schemes / Thames Water schemes / Clean & wastewater design
- Project management / Site supervision / Site surveys / Project tendering
- CDM 2015 / Health & safety / Medium-risk confined space / Street works
- AutoCAD 2D / StruMap GE / MapInfo / ArcGIS / Synergi Water / InfoNet / Microsoft Office

PROFESSIONAL EXPERIENCE

❖ TIFAND LIMITED — *(May 2021 – Present)*

Senior Design Engineer

- Produce preliminary drawings for temporary works design development.
- Assist senior management in producing designer's risk assessments and temporary works management reports.
- Provide administrative assistance to the temporary works design team where required.
- Evaluate preliminary structural calculations from feasibility to detailed design stage and write reports.
- Ensure residual risks inherent within the design are clearly communicated on layout information.
- Produce preliminary Temporary Works Audit reports for senior management review and approval.
- Identify safety-critical components on drawings, including recommendations for specific inspections and tests required to demonstrate adequacy.
- Provide graphical construction sequence information for site method statements, task briefings and risk assessments.

❖ **AMEY CONSULTANCY — (December 2018 – May 2021)**

Assistant Engineer – HS2

- Produced AutoCAD clean water detailed designs on complex schemes to the Severn Trent Water design manual.
- Determined route options and mains sizing to provide the most efficient solution for each situation.
- Carried out site surveys to determine safe and suitable routes and identify hazards not acknowledged during desktop feasibility.
- Planned site survey activities, including trial holes and stop tap surveys.
- Produced detailed designs from site investigation results in accordance with the STW Design Manual and CDM 2015.
- Prepared signed construction drawings, design risk assessments, schedules of works and pre-construction information packs for client handover.
- Attended collaborative planning meetings with the Principal Contractor and the client.

❖ **SNC-LAVALIN / ATKINS — (July 2015 – November 2018)**

Assistant Engineer – AMP6 Framework

- Worked on wastewater projects, sewer rehabilitation techniques and notional solutions for collapsed sewers causing category 3 and 4 flooding.
- Liaised with Principal Contractors to ensure project delivery and up-to-date site documentation to CDM 2015.
- Ensured site works progressed per drawings and conducted weekly and monthly target meetings.
- Delegated work to junior staff on surface and foul water drainage projects.
- Applied clean water logging techniques, including installation of reservoir transducers.
- Led and assisted on surveying projects using EDM, GPS and levelling.
- Reviewed risk assessments and method statements and obtained PASCAs from STW Service Delivery to ensure contractors worked safely.

❖ **WERM LTD — (July 2012 – June 2015)**

Water Surveyor – Thames Water Framework

- Operated on upwards of 7 projects from planning stages to conclusion.
- Coordinated the surveying and rectification of 300 properties across various London projects.
- Used pollution-reduction techniques including manhole screening, tracing, drainage sounding, cage installation and CCTV drainage surveys, with AutoCAD outputs.
- Worked with Thames Water, local councils, the Environment Agency and London Boroughs.
- Managed site health and safety, quality and environmental compliance, including traffic management and public hazards.
- Delivered performance and quality targets and monitored defects and penalties.

❖ **BOWMER & KIRKLAND LTD — (June 2011 – September 2011)**

Summer Placement

- Undertook design and related drawing work for a variety of construction projects.

- Ensured reinstatement projects were delivered within target cost and time.
- Attended design meetings to monitor progress and undertook setting out and site investigations.

EDUCATION & TRAINING

- BSc Civil Engineering
- National Water Hygiene Card / SHEA Water Card
- Street Works Card / Confined Spaces Qualification

PROFESSIONAL MEMBERSHIPS

- CIWEM – Chartered Institution of Water and Environmental Management (Member since 2015)

LANGUAGES

- Fluent English
- Fluent French
