

Farai MARUME

Design Manager

PROFILE

MSc-qualified civil engineer (EngTech MICE) with extensive experience in temporary works design and management across HS2, rail, nuclear, highways, bridges, high-rise buildings, heavy civils, utilities and flood defence schemes in the UK and Zimbabwe. Experienced in Category 1 and 2 design of formwork and falsework, piling and working platforms, excavation support and temporary stability of permanent and new structures, together with structural reinforced concrete and steelwork design and detailing. Brings strong delivery experience as Lead TWC, Site Agent and Project Manager, with award-recognised quality performance.

CORE SKILLS

- Temporary works design – Cat 1 & 2: formwork, falsework, piling & working platforms, excavation support, edge protection
- Temporary stability of permanent and new structures / Hoarding, signs and temporary access / Reinforcement stability
- Temporary works management – BS 5975 / PAS 8811 / HS2, Network Rail and nuclear standards / Design appointments & audits
- Structural RC and steelwork design and detailing, including construction methods and sequencing
- Design coordination & management / Quality control / Health & safety legislation / Interface management
- Project planning, supervision, team leadership and progress reporting / NEC3 & JCT contracts
- AutoCAD / Revit / Prokon / LUSAS / Slope/W / Primavera / MS Project / CEMAR / ProjectWise / BIM 360 / Novade / BIMXtra

PROFESSIONAL EXPERIENCE

❖ TIFAND LIMITED — (*December 2025 – Present*)

Design Manager

- Undertake Category 1 and 2 temporary works designs, including formwork and falsework, excavation support, piling and working platforms, temporary stability of permanent and new structures, hoardings, temporary access and edge protection.
- Prepare design calculations, drawings, design risk assessments and design check certificates in accordance with BS 5975 and PAS 8811.
- Respond to temporary works design briefs and carry out site visits to confirm site conditions, constraints and construction sequences.

- Carry out structural reinforced concrete and steelwork design and detailing, including construction methods and sequencing.
- Undertake independent checks of temporary works designs prepared by others.
- Liaise with Temporary Works Coordinators, permanent works designers and site teams to resolve design and buildability issues.
- Use Prokon, LUSAS, Slope/W, AutoCAD and Revit to deliver designs, and manage design information through ProjectWise and BIM 360.

❖ EKFB — (May 2025 – November 2025)

Lead TWC – Southern Section of G2S, HS2 C23 Package

Scope includes 1 No. deep cutting (28 m), 1 No. green tunnel, 4 No. embankment sections, 3 No. overbridges, 2 No. major viaducts, 1 major highway including 3 minor roads, and utilities diversion.

- Manage the TW design process to BS 5975, PAS 8811 and HS2 standards: identification, development, design, implementation and change management, designer and TWS appointments, and audits.
- Deep excavation cuttings and retaining structures, including sheet piles, concrete piles and gabions.
- Drainage design, temporary ditch/river diversions and consenting requirements.
- Highway design and construction, including RSA, utility protection and vehicle restraint design and consenting.
- Bridge and viaduct construction, bottom-up and top-down, including scaffolding, falsework, formwork, rebar stability, precast units, temporary supports and loadings, crane foundations, piling platforms and temporary bridge jacking.
- Site establishment, including temporary access roads, hardstands, site and foul drainage and cabin foundations.
- Tunnelling works, including exit portal buildings.

❖ BAM – TRANSPENNINE ROUTE UPGRADE — (February 2025 – May 2025)

Lead TWC & CRE-C TW

Demolition of three overbridges, construction of new bridges and reconstruction of an existing station to step-free access standard, interfacing with live rail.

- Managed the TW design process to BS 5975 and Network Rail standards, including designer and TWS appointments and audits.
- Excavations and retaining structures, bridge demolition sequence, and formwork and falsework design.
- Temporary structural stability and loading assessments, and scaffold access platforms around building facades.
- Plant working platforms for cranes, pumps and HIABs on bridges; temporary utility bridges and service protection; site establishment.

❖ KIER / BAM – HINKLEY POINT C — (October 2024 – February 2025)

Lead TWC – Ancillary Buildings (Nuclear)

Construction of one three-storey building and two two-storey buildings.

- Managed the TW design process to BS 5975 and nuclear standards, including designer and TWS appointments and audits.
- Deep excavations, retaining structures and soil nailing; formwork and falsework design including back-propping.
- Temporary structural stability and loading assessments, including structural reinforced concrete design.
- Scaffold access, plant working platforms, tower crane foundations and site establishment.

❖ EKFB — (August 2021 – October 2024)

Lead TWC – Northern Section of the HS2 C23 Package

Scope includes 3 No. deep cuttings, 4 No. overbridges, 4 No. viaducts, 1 major highway including 3 minor roads, and utilities diversions including a 900 mm diameter gas main.

- Managed the TW design process to BS 5975, PAS 8811 and HS2 standards, including designer and TWS appointments and audits.
- Deep excavation cuttings, retaining structures, soil nailing, counterforts and reinforced earth.
- Drainage design, temporary ditch/river diversions and highway design and construction, including consenting.
- Bridge and viaduct construction including scaffolding, falsework, formwork, rebar stability, precast units, temporary supports, crane foundations, piling platforms and temporary bridge jacking.
- Utilities diversion, including directional drilling under track embankment and pipe bridges, and site establishment.
- Nominee – EKFB C23 Individual Performance Award 2022 and 2024.

❖ VOLKER FITZPATRICK — (April 2018 – August 2021)

Project TWC / CRE-C

- Brent Cross West Station (£35m, NEC Option C) – Project TWC for all TW on GRIP 5–8 works, including demolition of the existing shed, station entrance buildings, two island platforms, overbridges and ticket hall/concourse with M&E works.
- Ilford and Romford Refurbishment (£21m, NEC Option A) – CRE-C and TWC for all temporary and permanent works on GRIP 6–7 works under the CP5 framework, rebuilding stations for lift access while kept open to the public.
- Bow UTX & Meridian RRAP (£1m, Christmas 2019 works) – Project TWC for UTX construction and cable troughing, including excavation under track and platforms, scaffold access and edge protection.
- West Anglian Main Line Capacity Improvement (£150m, NEC3 Option A) – Project TWC for GRIP 4–8 works, including 6 miles of rail line and capacity improvement of Tottenham Hale and Northumberland Park stations kept open during works.
- Meridian Water Station (£32m, NEC3 Option A) – Project TWC for GRIP 4–8 design and construction of a new station over live track, managing excavations, precast stability, crane foundations, plant platforms, roof edge protection, steel stability, hoardings and scaffold.

❖ INTERSERVE CONSTRUCTION LIMITED — *(January 2008 – April 2018)*

Site Agent / Sub Agent

- Sunderland Ground Water Stations (£5m, NEC3 Option A) – Site Agent managing MEICA and civils delivery for the refurbishment of 8 ground water stations to DWI standards under AMP6, and Cat 1 & 2 design support to the in-house TW team.
- Poole Bridge Approach Spans (£4.7m, NEC3 Option A) – Site Agent managing demolition and reconstruction of approach spans and refurbishment of lifting bridge spans, with Cat 1 & 2 TW design support.
- EA Eastern Barriers (ECI) / Halstead FAS (£8m, NEC3 Option C) – Site Agent for MEICA refurbishment and commissioning of 5 flood gates and embankment remedial works; Colne Barrier works won an ICE East of England Merit Award 2016.
- EA Reconditioning Works (ECI) Northern Area – 78 sites (£13m, NEC3 Option C) – Sub Agent for design management, construction, quality control and TWC for 20 sites; winner of the Interserve Infrastructure Annual Quality Awards individual award 2012–13.
- Riverside Sludge Digester Upgrade (£56m, IChemE) – Sub Agent for Beckton pumping station upgrade and refurbishment of 6 km of twin mains.
- Thames Gateway Water Treatment Plant (£250m, IChemE) – Sub Agent managing structural elements, inlet works, mains, pumps and pipe fit-out.

❖ SIXTH CENTURY CONSTRUCTION — *(January 2002 – December 2007)*

Project Manager

- Zimbabwe Electricity Supply Company (NEC Option B) – won and delivered 6 new substations and 2 storage hardstands, including MEICA installation.
- True Band Investments (NEC Option B) – design and build of an open-shell RC and structural steel warehouse, providing Cat 2 design checks.

❖ COSTAIN AFRICA — *(March 1996 – December 2001)*

Junior Engineer to Section Manager

- Joina Centre (JCT, 26-storey building) – Façade & Services Section Manager, managing scaffold access strategy including TW design, façade and services subcontractors.
- Beverley Building Society, Kwekwe and Marondera – Site Manager for all aspects of construction delivery.
- Cine Cinema, Eastgate Commercial Auditorium – Section Manager for RC frame construction with brick infill and fit-out.
- Harare City Council – Section Manager for a 1 km section of 900–1200 mm diameter trunk sewer.
- Willowvale Industrial Park (JCT) – Senior Engineer for a structural steel open-shell industrial warehouse.

❖ YOUNG BAMU JENNING CONSULTING ENGINEERS — *(January 1999 – December 1999)*

Designer

- United Coca-Cola Bottling Plant – design of an open-shell steel structure with 36 m space trusses and no intermediate supports.
- Mutual Insurance Office Block – design of a 3-storey RC structure on shallow pad foundations.

- Ministry of Local Government – design of stairwells for 6 five-storey blocks and Cat 2 checking of RC frame and slab design.

EDUCATION & TRAINING

- MSc Civil Engineering
- EngTech MICE – registered with the Engineering Council (CEng Career Appraisal – February 2027)
- CITB SMSTS – valid to July 2030

PROFESSIONAL MEMBERSHIPS

- Institution of Civil Engineers (EngTech MICE)
