

Kiki-Caron KISEMPIA

Senior Quality Assurance and Compliance Engineer (Civil Engineering, Quality & Compliance)

PROFILE

Quality professional with a proven track record of implementing and improving quality tools and techniques within the rail, tunnelling, nuclear and construction industries. Delivered successful tunnelling and shaft segment solutions and rail electrification for public sector schemes. A rigorous and accurate Quality Engineer, enabling and maintaining Quality Plans, project assurance and conformity through site inspection, NCR management and quality reporting. Expertise in health and safety, quality in construction, railway quality management, precast concrete, tunnelling and the nuclear industry.

CORE SKILLS

- Quality management / Quality assurance & control / ISO 9001 Lead Auditor / Internal & external auditing
- Inspection & Test Plans (ITPs) / Quality Management Plans / NCR management / Root cause analysis
- Temporary works co-ordination (TWC) / Contract management (NEC3) / Health & safety regulations (CDM)
- Major infrastructure projects – rail and nuclear / Tunnel & shaft design and construction
- Concrete technology / Concrete manufacturing / Precast tunnel and shaft segments
- Change management / Continuous improvement / Lean Six Sigma / Integrated Management Systems
- PTS AC-DCCR holder / IOSH Managing Safely / Microsoft 365

PROFESSIONAL EXPERIENCE

❖ TIFAND LIMITED — (April 2022 – Present)

Senior Quality Assurance and Compliance Engineer

- Act as the interface between the construction, design and quality functions, providing independent on-site assurance.
- Support the development and implementation of Inspection and Test Plans.
- Undertake control point checks as identified within Inspection and Test Plans.
- Ensure changes to scope and/or specification are fed into QA/QC on site.
- Monitor and review the quality and assurance compliance of Lead Engineers' and technical teams' works.
- Review non-conformances and report with recommendations for improvement.
- Ensure required assurance documentation is compiled for hand-back / entry into service requirements.
- Promote and ensure safe working practices in accordance with the appropriate safety legislation.

❖ **BABCOCK INTERNATIONAL — (November 2021 – April 2022)**

Senior Quality Assurance Engineer

- Supported projects at an early stage to define appropriate quality requirements.
- Raised awareness of quality principles and the business quality management system across projects and the supply chain.
- Advised project management, engineering and construction disciplines on quality matters.
- Reviewed and marked up quality documents such as ITPs and Quality Management Plans, and supported contractors in their development.
- Advised suppliers and subcontractors on producing Life Time Records (LTRs) and reviewed them against specified requirements.
- Ensured handover documentation was prepared and maintained to enable timely work package completion.
- Planned and executed approval assessments and monitoring audits of projects, suppliers and subcontractors.
- Reviewed inspection and surveillance reports and performed product inspections where SQEP to do so.
- Prepared inspection and audit reports and regular project quality updates.

❖ **BALFOUR BEATTY – HINKLEY POINT C — (June 2019 – September 2021)**

Quality Assurance Engineer and Temporary Works Supervisor

- Proactively supported and advised on all aspects of quality on site, including risks and issues.
- Developed and maintained excellent relationships with internal and external customers.
- Worked alongside the Temporary Works Coordinator, assisting with writing TW briefs and supporting the site delivery team.
- Reviewed and marked up ITPs and Quality Management Plans and supported contractors in their development.
- Ensured handover documentation was prepared and maintained on an ongoing basis.
- Planned and executed approval assessments and monitoring audits of projects, suppliers and subcontractors.
- Supported efforts to raise the quality and delivery capability of suppliers and contractors.

❖ **AMEY CONSULTING AND RAIL — (April 2018 – May 2019)**

Compliance Manager

- Led project teams in using the Integrated Management System and collaborative working with the client on ISO 44001.
- Delivered project Quality Plans with Project Managers and prepared local procedures and processes.
- Monitored the timely delivery of project deliverables.
- Identified and led Quality and Lean improvement initiatives.
- Undertook quality surveillance tours and tracked and analysed the close-out of audit actions.
- Undertook and supported root cause analysis of significant quality problems.
- Provided feedback on the effectiveness of the Integrated Management System.

❖ **CARILLION — (July 2017 – October 2018)**

Quality Engineer Manager

North-West Electrification Project.

- Managed and designed temporary works throughout the scheme, as the appointed Temporary Works Coordinator (TWC) maintaining the TW schedule.
- Delivered scheme Quality Plans and chaired meetings on quality alerts and root cause analysis.
- Supported project and asset management teams to plan product realisation through inspection, test plans and deliverables.
- Ensured TW design briefs were adequate and reflected site requirements, and that TW was implemented in accordance with drawings and specification.
- Undertook 1st and 2nd party audits, checking certification bodies and the operation of the non-conformance system.
- Reviewed documentation supplied by subcontractors and suppliers.

❖ **FP MCCANN LTD — (March 2014 – July 2017)**

Quality Coordinator / Laboratory Manager

- Managed quality document control for the manufacture of precast shaft and tunnel segments.
- Prepared ITPs and quality check sheets as per design.
- Maintained communication between design and production teams to ensure the latest drawing revisions were used.
- Ensured all laboratory activity adhered to British Standards.
- Reported non-conformances to the Quality Manager and audited, filed and submitted quality control documentation.

❖ **CARILLION — (August 2012 – February 2013)**

Road Safety Engineer

- Inspected street works activities and completed on-site risk assessments on the highway.
- Liaised with team members on the design and supervision of allocated schemes.
- Planned and implemented minor highway, traffic and road safety schemes.
- Assisted the site team with excavation support as TWC and ensured temporary works were maintained and inspected.

EDUCATION & TRAINING

- Bachelor's degree in Civil Engineering
- ISO 9001 Auditor – Lead Auditor / Internal Auditor / Total Quality Management System
- Lean Six Sigma
- Temporary Works Co-ordination
- CDM – Health & Safety Regulations / IOSH Managing Safely
- NEC3 Conditions of Contract

- Tunnel and Shaft Design & Construction / Quality in Construction
- Environmental Management System
- CSCS Card for Professionals

PROFESSIONAL MEMBERSHIPS

- Institution of Civil Engineers (UK) / Chartered Quality Institute (UK)
- UK Nuclear Special Interest Group / Construction Special Interest Group (UK)
- Temporary Works Forum (UK) / British Tunnelling Society
