

Rico BOLOGNA

CAD Manager (Computer Aided Design)

PROFILE

CAD Manager within the Civil Engineering and Digital Engineering department, qualified with a degree in Architecture, Design and Technology and City & Guilds Level 3 Engineering Manufacturing and Fabrication. Brings 20 years of experience offering a wealth of AutoCAD and Revit modelling, detailing and graphic presentation with sustainable strategies. Five years on nuclear projects including MENSA and Chernobyl developed an excellent understanding of functionality. Skilled at juggling multiple tasks under pressure and producing technical drawings in a smart, accurate and cost-effective way.

CORE SKILLS

- CAD management / CAD standards & templates / Team leadership / Software and hardware procurement
- AutoCAD 2D & 3D / Autodesk Revit / AutoCAD MEP / Navisworks clash detection / BIM / Photoshop
- Architectural design & documentation / Commercial & public architecture / Site analysis
- Construction & fabrication documentation / Operation & maintenance manuals / Document control
- Mechanical AHU, HVAC, FCU & BCU / Electrical & fire security detailing / Nuclear components
- Materials research, properties & problem solving / Health & safety regulations (CDM 2015)
- RIBA Plan of Work / NBS / BS EN & ISO standards / JCT & NEC ECC contracts / Microsoft Office

PROFESSIONAL EXPERIENCE

❖ TIFAND LIMITED — *(December 2022 – Present)*

CAD Manager

- Develop short- and long-term CAD plans that provide adequate detail without over-planning.
- Organise CAD standards, server and folder structures, supporting files and archives, including staff, budgets and processes.
- Lead on tools, talent, technology, training and time across the CAD function.
- Coordinate the flow of CAD-related work, including scheduling software rollouts and downtime, working with multiple teams and adjusting deadlines as needed.
- Track the performance of drafters, technology, systems, standards and CAD production timelines.
- Establish screening processes for new hires, take part in interviews and participate in employee evaluations.
- Motivate the team through both extrinsic and intrinsic motivation to encourage progress.
- Manage staff, projects and the procurement of software and hardware, plus the day-to-day output of the CAD function.

- Drive customisation and standardisation for better productivity and customer satisfaction.
- Oversee the work of CAD drafters, ensuring every drawing is legible, professional and adheres to project standards.
- Work with the Engineering Lead on technical issues, training and CAD system issues.
- Maintain contact with clients for clarification, coordination and negotiation of critical issues.
- Identify opportunities to increase workflow efficiency and recommend best-practice solutions.
- Maintain records of design deliverables and ensure project documentation and contracts comply with the standards set by the Project Delivery Board.

❖ SODEXO (NHS MANCHESTER ROYAL INFIRMARY) — (May 2019 – November 2022)

Senior CAD Technician

- Worked on multiple projects at Manchester Royal Infirmary (MRI).
- Produced technical drawings from engineers' data, including modifications and building life-cycle records.
- Advised on approaches to improve performance and aesthetics within building life-cycle records.
- Provided construction, mechanical, electrical and fire layouts for building performance and compliance management.
- Recovered lost construction drawings and digitised old files into CAD to enable future modifications.
- Organised and managed the drawings library.
- Managed external design teams and took ownership of their designs.
- Performed calculations to predict flow, pressure, gas purity, strength and other system functionality.
- Specified parts and assemblies from suppliers and refined high-level diagrams into detailed construction drawings.

❖ THERMOTECH SOLUTIONS (ATALIAN GROUP) — (August 2018 – May 2019)

Project Draughtsman / Designer

Projects included Dukes Lodge (Holland Park, London), Express Building (Manchester), Spinningfields, Electricity North West, GUP SHUP Hale, Cameron House Hotel, Greenside Schools and Ascot House.

- Produced technical drawings from site surveys and client briefs, including AHU, HVAC, FCU and BCU system proposals.
- Advised on design approaches to minimise cost while improving performance and aesthetics.
- Produced plans, elevations and sections for the manufacture, installation and maintenance of mechanical and electrical systems.
- Held regular reviews with Project Managers and coordinators prior to client meetings.
- Ensured design briefs were met in line with specifications, site practice and buildability.

❖ MAT — (August 2017 – August 2018)

Project Draughtsman / Designer

- Produced AutoCAD designs for clean rooms and hospitals within a tight-knit design team.
- Juggled multiple projects including Pire Hospital, Chester Neonatal Hospital operating theatre and Euxton Hall Hospital.
- Carried out site surveys and client briefings covering AHU, HVAC, FCU and BCU systems.

- Designed mechanical details for operating theatres, incubators and gas rooms, and drawings for canopies, supports, ductwork and air handling equipment.

❖ EXYTE (M+W HARGREAVES) — *(April 2013 – August 2017)*

Project Draughtsman / Designer

- Managed and designed nuclear components on projects including MENSA, Chernobyl, TMF, Faringdon and Eliot.
- Produced General Arrangement drawings in AutoCAD and coordinated Revit and AutoCAD MEP models.
- Used Navisworks for clash detection and maintained document control and traceability records.
- Produced company specification standards and procedures for renovating existing and supporting new products.
- Produced 3D models and detailing for conventional and nuclear buildings.
- Prepared and checked detailed technical drawings and preliminary design concepts.
- Supported management with tender packs, programmes of works and technical responses.
- Developed processes, procedures, standards and quality controls for technical design.

EDUCATION & TRAINING

- Bachelor's degree in Architecture, Design & Technology
- City & Guilds Level 3 Engineering Manufacturing and Fabrication
- BIM (Building Information Modelling)
- CDM 2015 – Principal Designer & Designer Duties / EHS (Environment, Health & Safety)
- Principles of Construction Contracts and Law / Procurement
- Foundation Design / Fire Risk Management in Construction

PROFESSIONAL MEMBERSHIPS

- Royal Institute of British Architects (RIBA) / Institution of Structural Engineers
- Association for Consultancy and Engineering (ACE) / Institution of Mechanical Engineers (IMechE)
- Institution of Engineering and Technology (IET)
