

Serge HOKOKO

Principal Design Engineer

PROFILE

Professional engineer with extensive experience in design, management and site supervision of highways schemes. Experienced in the design of new highway link roads, improvement and maintenance schemes, including roundabout design, junction improvements, carriageway resurfacing and highways drainage, from conception through to detailed design. Experienced in client-facing roles and familiar with Highways England working procedures, with major scheme experience on HS2 and smart motorways. Mentors junior members of the team and is a strong team player.

CORE SKILLS

- Highways design – new, improvement and renewal schemes / Pavement engineering / Highways drainage
- DMRB / Manual for Streets / MCHW / TSM & TSRGD / Sustainable Drainage (SuDS)
- Supervision of highway works / Inspection of bridges / Site inspections
- Project management / Contract documents / Commercial & financial management / NEC3
- Health & safety – CDM 2015 Designer's duties / Quality assurance & control
- AutoCAD Civil 3D & 2D / Storm and Sanitary Analysis / KeyPOST & KeyLINES / Microsoft Office

PROFESSIONAL EXPERIENCE

❖ TIFAND LIMITED — *(May 2022 – Present)*

Principal Design Engineer

- Oversee project management and technical delivery of consultancy projects and work packages in pavement engineering.
- Perform airfield and road pavement inspections and report treatment recommendations.
- Act as technical lead on strategic projects, developing design strategies and pavement options to suit varying budgets for new construction and maintenance.
- Prepare and review contract documents.
- Conduct pavement analysis, design, specification and reporting.
- Manage teams delivering pavement projects, including investigation reports, design projects and site supervision.
- Contribute to the development of asset management policy for pavements and related assets.
- Ensure deliverables are prepared on time, within budget and to the highest quality standards.
- Enhance client and industry relationships with public and private stakeholders.
- Promote pavement and asset management within TIFAND Limited.

- Develop talent within the team through coaching and mentoring, supporting technical career development.
- Champion company processes and policies, ensuring adherence to safety, welfare, quality and environmental requirements.

❖ SYSTRA — (July 2021 – February 2022)

Principal Engineer

HS2 Project – Main Works (Budget over £100 billion)

One of the largest and most complex infrastructure projects ever undertaken in the UK, connecting towns and cities in the South, Midlands and North.

- Worked independently and proactively on temporary and permanent highway projects, delivering to HS2 and DMRB standards on time and to budget.
- Led small design teams and performed project management duties aligned with Systra and client QA protocols, reporting on progress, risk and finance.
- Took individual responsibility for projects as the main point of contact for the client.

❖ COSTAIN — (February 2020 – July 2021)

Senior Contract Highways Engineer

HS2 Project – Enabling Works

- Attended design and site meetings and carried out site inspections.
- Prepared technical reports, fee proposals, resource levels and associated HSE, CDM and QA documentation.
- Ensured projects were completed in a timely and cost-effective way.
- Provided technical guidance, managed team members' workloads and communicated with other disciplines and construction teams.

❖ AONE+ — (October 2018 – February 2020)

Contract Project Engineer

Led multiple maintenance and improvement schemes simultaneously from concept to handover for construction, directing a team of experienced technicians to deliver to DMRB standards.

- Undertook scheme investigation, site inspections, data collection and analysis.
- Delivered preliminary and detailed design, including departures from standard.
- Prepared technical documents, drawings, calculations, specifications and tender documents.
- Carried out the duties of a designer under CDM 2015.
- Designed flexible and rigid pavements, junction improvements and carriageway widening, and highway drainage to DMRB, TSM and TSRGD.
- Assisted and mentored junior engineers.

❖ KIER HIGHWAYS — *(January 2017 – October 2018)*

Civil Engineer

A1 Harlaxton to Stamford Resurfacing Scheme (14 km, £4 million)

- Undertook the design from client brief through preliminary and detailed design to handover, including site investigation, contract documents and drawings.
- Liaised with the client, contractors and stakeholders; the scheme was designed and built successfully.

A6/A5111 Thurlston to Raynesway MDP Scheme (June – September 2017)

- Lead and only engineer on the 4 km dual carriageway resurfacing, from client brief to handover, producing CAD drawings and technical reports.

A5 Dodford to Old Trafford – Flooding Resilience Study (June – September 2017)

- Assessed existing gully spacing on a 26 km carriageway using DMRB HA 102/00 and carrier pipe capacity using WinDes.

❖ JACOBS — *(May 2014 – January 2017)*

Assistant Engineer

M6 Junction 16 to 19 Smart Motorway – All Lane Running (April – October 2016)

- Reviewed previous inspection reports and carried out structural inspections of 17 bridges to establish condition factors.

Crewe Green Link Road (August 2015 – March 2016)

- Site supervision ensuring works met client standards, specification, schedule, health and safety, materials and workmanship.

M56 Smart Motorway Project – Concept Scheme (April – August 2015)

- Carried out concept designs including new junction design and hard shoulder conversion to a running lane.

Elton Rail Sidings Proposed Connection – Network Rail (February – April 2015)

- Checked structural design calculations for a reinforced concrete track slab; produced as-built, land drainage and earthworks drawings.

M6 Feasibility

- Designed a new junction between Junctions 27 and 28 of the M6 using AutoCAD Civil 3D to TD 22/06.
- Assisted senior management with new tender opportunities.

EDUCATION & TRAINING

- MSc Civil Engineering and Construction Management
- BEng (Hons) Civil & Structural Engineering
- CDM 2015 – Principal Designer and Designer Duties
- NEC3 Conditions of Contract / Principles of Construction Contracts and Law
- Eurocodes EC1, EC2, EC3, EC5, EC6, EC7

- Sustainable Urban Drainage (SuDS) / Environmental Management System
- CITB SMSTS (Site Management Safety Training Scheme) / CSCS Card for Professionals

PROFESSIONAL MEMBERSHIPS

- Institution of Civil Engineers (UK)

HOBBIES AND INTERESTS

- Reading / Sunday school teaching
