

Theodoros GIANNEAS

Senior Design Engineer

PROFILE

MSc-educated Temporary Works Design Manager with experience across nuclear, energy, highways, rail, utilities and structures projects, including HS2, the Transpennine Route Upgrade and Hinkley Point C. Thorough knowledge of the design of scaffolds, formwork, falsework, retaining walls, slope stability, working platforms, decking, propping, temporary steel structures and shoring solutions for excavations. Combines hands-on design with coordination between suppliers, designers and site, developing TW design briefs and carrying out design checks. An enthusiastic, hardworking engineer who enjoys all aspects of design.

CORE SKILLS

- Temporary works design management / BS 5975 / TG20 / Design categories 0–3 / Independent design checks
- Formwork & falsework / Scaffolding (TG20) / Working platforms / Propping & shoring / Retaining walls / Slopes
- Temporary steel structures / Lifting design – spreader beams and cage transfer / Sign post & lighting column foundations
- Structural steel and reinforced concrete design to Eurocodes / Substation structures and foundations
- Design team management & mentoring / Design brief development / Supplier and third-party coordination
- Commercial control of TW budgets / Quotation review / Resource and workload planning in MS Project
- AutoCAD 2D/3D / Robot Structural Analysis / Navisworks / CADS / SAP 2000 / MATLAB / Minitab / Microsoft Office

PROFESSIONAL EXPERIENCE

❖ TIFAND LIMITED — *(June 2024 – Present)*

Senior Design Engineer

- Lead and manage the TIFAND temporary works design team, delivering TW designs in accordance with BS 5975, TG20 and the company TW procedure.
- Establish design briefs in full consultation with project teams, ensuring they reflect actual site conditions and all construction loads.
- Allocate suitable design and check resources across in-house and external design houses, and ensure designs are correctly categorised by risk and check category.
- Manage the quality assurance of all TW designs from design brief to As For Construction, including design check certificates, drawings, design risk assessments and calculations.

- Design and check formwork, falsework, scaffolding, working platforms, propping, shoring, retaining walls and temporary steel structures.
- Mentor TIFAND temporary works designers and carry out design checks.
- Liaise with permanent works designers, clients and contractors to resolve construction method and buildability issues.
- Carry out site visits to identify temporary works requirements and support the preparation of design briefs.
- Prepare fee quotations, review external design house quotations and control TW design budgets with the commercial team.
- Plan resources and workload in MS Project to deliver safe, workable temporary works to programme.

❖ BAM NUTTALL — (April 2022 – May 2024)

Temporary Works Design Manager

Transpennine Route Upgrade – Client: Network Rail (Budget £1.7 billion)

A transformative multi-billion-pound railway programme along the 70-mile route between Manchester and York via Huddersfield and Leeds, serving 23 stations with numerous bridges, viaducts, six miles of tunnels and 29 level crossings.

- Lead the production of TW design.
- Ensure design briefs are established with full consultation, are adequate and reflect the actual situation on site, considering all construction loads.
- Identify suitable personnel to carry out design and checks within internal and external design houses.
- Manage the quality assurance of all internal and external TW design from conception (design brief) to delivery (As For Construction).
- Ensure all TW designs include the associated documents: Design Check Certificate, drawings, design risk assessment and calculations.
- Manage and mentor in-house Temporary Works Designers and carry out design checks.
- Ensure construction teams are provided with safe, workable temporary works in a timely manner to suit the programme.
- Ensure the Temporary Works Procedure is applied fully and efficiently and that TW designs are suitably categorised.
- Liaise with permanent works designers to resolve construction method and buildability issues.
- Carry out site visits to identify TW requirements and prepare TW design briefs.
- Review external design house quotations and collaborate with the commercial team to keep TW budgets under control.
- Plan resources and workload in MS Project.

❖ INDEPENDENT DESIGN HOUSE LTD — (November 2021 – April 2022)

Temporary Works Design Manager

- Managed the design team, developed positive working relationships with clients and prepared quotations.
- Carried out temporary works design to BS 5975 and TG20: formwork, falsework, scaffolding, working platforms, sign posts, lighting column foundations, slopes, shoring, propping and retaining walls.

- Undertook Category 3 designs and checks of third-party designs using AutoCAD, Robot and Navisworks.

❖ BARHALE CONSTRUCTION — (November 2020 – October 2021)

Senior Temporary Works Engineer

- Carried out temporary works design to BS 5975 and TG20: formwork, falsework, scaffolding, working platforms, sign posts, lighting column foundations, slopes, shoring, propping and retaining walls.
- Undertook Category 3 designs and checks of third-party designs using AutoCAD, Robot and Navisworks.

❖ EKFB JV — (March 2020 – November 2020)

Temporary Works Design Manager

HS2 – Client: HS2 Ltd (Budget £2.3 billion)

Civil engineering works across an 80 km section of HS2 between the Chiltern Tunnel and Long Itchington Wood, including 15 viaducts, 5 km of green tunnels, 22 km of road diversions, 67 overbridges and around 30 million cubic metres of excavation.

- Led the production of TW design and ensured design briefs were adequate and reflected site conditions and construction loads.
- Identified suitable personnel for design and checks within internal and external design houses.
- Managed the quality assurance of all TW design from design brief to As For Construction, including all associated documents.
- Managed and mentored in-house Temporary Works Designers and carried out design checks.
- Ensured the Temporary Works Procedure was applied fully and designs were suitably categorised.
- Liaised with permanent works designers on construction method and buildability, and carried out site visits to prepare TW design briefs.
- Reviewed external design house quotations and collaborated with the commercial team to control TW budgets.

❖ COSTAIN — (June 2019 – March 2020)

Senior Temporary Works Engineer (contract role)

- Carried out temporary works design to BS 5975 and TG20: formwork, falsework, scaffolding, working platforms, sign posts, lighting column foundations, slopes, shoring, propping and retaining walls.
- Undertook Category 3 designs and checks of third-party designs using AutoCAD, Robot and Navisworks.

❖ BOUYGUES CONSTRUCTION – HINKLEY POINT C NUCLEAR POWER STATION — (April 2018 – June 2019)

Senior Temporary Works Engineer

- Carried out temporary works design to BS 5975 and TG20, including formwork, falsework and scaffolding.
- Designed steel elements to transfer reinforcement cages and spreader beams for lifting cages.
- Coordinated with third parties and used Robot analysis software and Navisworks 3D.
- Prepared AutoCAD drawings and structural reports.

❖ UTILITY CONSULTANCY & ENGINEERING (UCE) LTD – BARNSELY — *(May 2017 – April 2018)*

Graduate Civil Structural Engineer

- Prepared drawings in AutoCAD.
- Designed structural steel elements (columns, beams, connections) and substation structures and foundations.
- Produced structural calculations to Eurocodes, including reinforced concrete design of slabs, columns, beams and foundations, using CADS software.
- Supported the Senior Civil Engineer.

EDUCATION & TRAINING

- MSc Civil and Structural Engineering – University of Bradford
- BEng (Hons) Civil and Structural Engineering – University of Bradford
- Bachelor of Engineering – Civil and Structural Works – Piraeus University of Applied Sciences
- Academic project: Endeavour Wharf Centre, Whitby (2015) – structural steel design to EC3 and concrete foundations
- AutoCAD 2D/3D – IEK Ksini, Patras (2014)
- Seminar: Bioclimatic Constructions, History of Construction, Methods of Imprinting – TEI of Piraeus (2010)
- CSCS Card

LANGUAGES

- Fluent Greek
- Fluent English

HOBBIES AND INTERESTS

- Basketball (university men's team) / Travelling
