

Page 1 of 1	Appointment of Contractor's Responsible Engineer (CRE)				
	Form Ref	NR/L2/INI/02009/F0040	Issue Date	05/09/2015	Issue

Purpose

This document records the acceptance of the Contractor's Responsible Engineer (CRE), by the Designated Project Engineer including a summary of the competence assessment supporting the acceptance.

Background

The Contractor's Responsible Engineer is the person within a design and/or construction organisation with the responsibility for the day-to-day management and co-ordination of the technical and engineering activities for a specific engineering discipline / Project.

Details of Appointment

The delegation applies to the following Project: Filton Bank 4 Tracking
Contractor: Alstom Engineering Discipline: Civils

Responsibilities:

☐ Design ☒ Construction
☐ Temporary Works Coordinator*

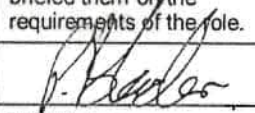

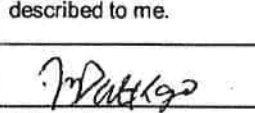

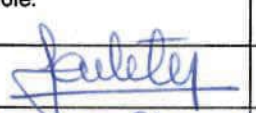

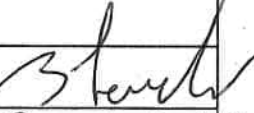

Competence Assessment

The CEM to assess and Discipline PE (Network Rail) to review the capabilities of the candidate against the criteria listed below. They may use the Competence Quads as defined in the NR/L2/INI/02009/02 and Temporary Works Coordinator's competencies as defined in the BS5975 and/or Temporary Works Forum guidance.

* If applicable, the competence assessment should take into account whether or not the CRE is also undertaking the role of Temporary Works Coordinator. The appointment of TWC is to be in accordance with the requirements of BS5975.

Technical / professional engineering qualifications and training records.	Y/N	Understands and has the time to undertake the role(s).	Y/N
Practicing specialist in the specialist engineering discipline for which the nomination is made.	Y/N	Can influence or directly manage those whose roles contribute to compliance.	Y/N
Knowledge and years of experience of asset design practice including compliance management based on CV review and discussion.	Y/N	Familiar with the H&S aspects of design and construction (risk assessments).	Y/N
Knowledge and years of experience of asset construction practice including compliance management based on CV review and discussion.	Y/N	Understands their responsibility for appointing adequate competent engineering resources to undertake the works.	Y/N
Has the management skill to undertake the role.	Y/N	Has an understanding of interfaces between engineering disciplines involved in the project.	Y/N
Understands NR/L2/INI/02009 and the relevant Engineering Management Plan.	Y/N	Understands the requirements, roles and responsibilities with regard to CDM & CSM-RA Regulations.	Y/N
Understands the roles and responsibilities associated with Temporary Works (as described in BS5975).	Y/N	Can monitor engineering activities regarding competence, safety, environment, cost, programme, information, testing and commissioning.	Y/N

Additional Comments:**Record of Appointment**

Declaration	I have assessed the nominee and confirm that they are competent to undertake the role. I have briefed them on the requirements of the role.	I agree I am competent to undertake the required role and understand the role and responsibilities described to me.	I have reviewed the nominee and confirm they are suitable for the role.	I accept the nominee as being suitable for the role.
